

## View Factor 28

A long three-quarter circular body is connected to two flat plates perpendicular to each other. Determine the view factor  $\Phi_{31}$ :

A flat plate can never see itself and therefore:

$$\Phi_{11} = \Phi_{12} = 0$$

Surfaces 1 and 2 cannot see each other and therefore:

$$\Phi_{12} = \Phi_{21} = 0$$

Combining this with the summation rule ( $\Phi_{11} + \Phi_{12} + \Phi_{13} = 1$ ) one finds that:

$$\Phi_{13} = 1$$

Using the reciprocity rule ( $A_1 \Phi_{13} = A_3 \Phi_{31}$ ) one will find:

$$\Phi_{31} = \Phi_{13} \frac{A_1}{A_3} = \frac{\frac{1}{2}DL}{\frac{3}{4}\pi DL} = \frac{2}{3\pi}$$
