

Heat Transfer Correlation 4.2

A fluid streams over a flat plate.
Calculate the mean heat transfer coefficient $\bar{\alpha}$.

Reynolds number:

$$\text{Re}_L = \frac{u \cdot L}{\nu} = 9.61 \cdot 10^5$$

Nusselt number:

$$\overline{\text{Nu}}_L = 0.036 \cdot \text{Pr}^{0.43} \cdot (\text{Re}_L^{0.8} - 9400) = 1.86 \cdot 10^3$$

Heat transfer coefficient:

$$\bar{\alpha} = \frac{\overline{\text{Nu}}_L \cdot \lambda_f}{L} = 4.67 \text{ W/m}^2\text{K}$$
